

SLATE DAM PROJECT GAINS MORE AREA

HIGHLIGHTS

Slate Dam Gold Project

- EL 25/534 and ELA25/558 purchased (68km²)
- PoW approved for drilling on E25/553

Increasing Ground Holding in Black Flag Group Sediments

Aruma Resources Limited (ASX: AAJ) ("Aruma" or the "Company") is pleased to announce the purchase of the Juglah leases (EL25/534 and ELA25/558, 22 graticular blocks) over the southern extension of the Slate Dam project 40km east of Kalgoorlie. The tenements cover prospective gold ground within the geology that hosts the Majestic and Imperial Gold Deposits. The adjacent Mulga Dam lease is scheduled to be granted in the coming month.

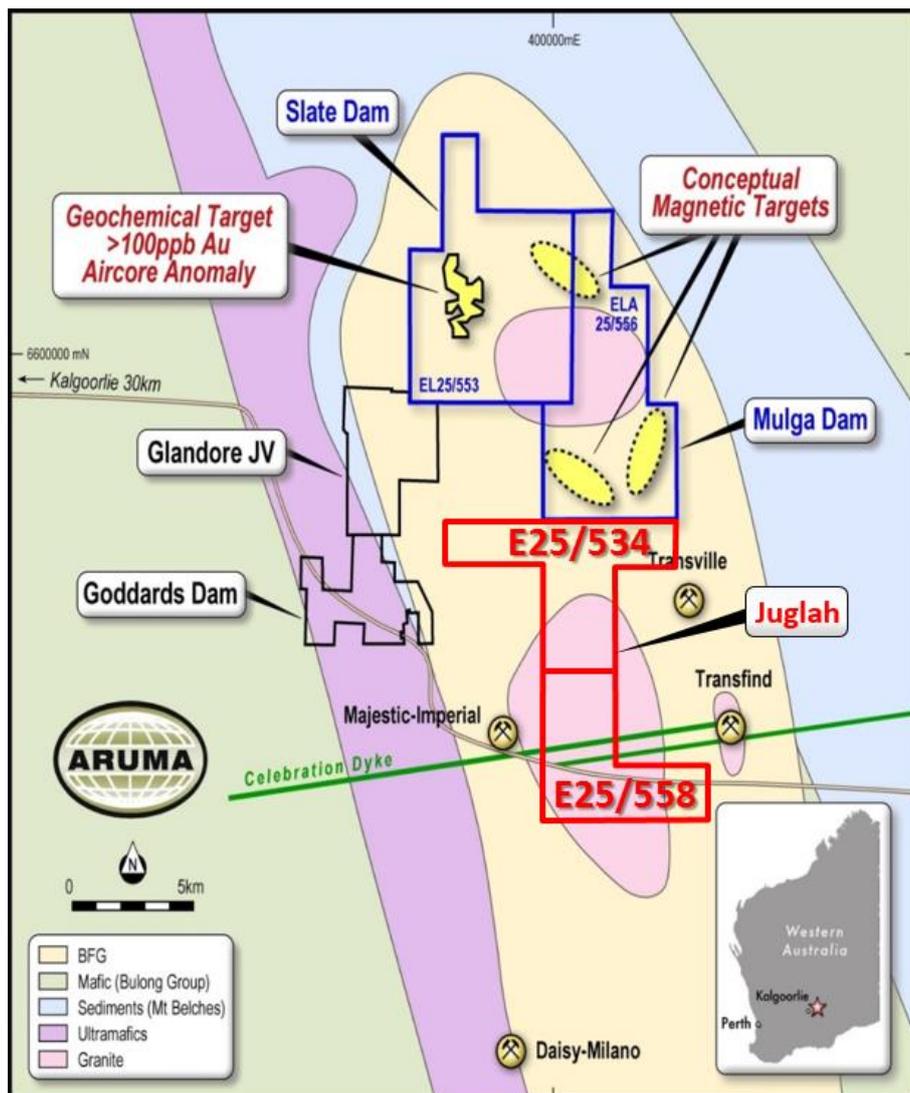

Figure 1 Aruma's Kalgoorlie Projects now cover 260km² of highly prospective gold geology in the Black Flag Group (BFG). The new leases are shown in Red.

The leases have been purchased from Resource Holdings Pty Ltd for 10 million Aruma shares (escrowed for 6 months) and a \$20,000 cash component.

Statutory requirements for the approved program of work (PoW) and Heritage Surveys are being arranged and the existing exploration databases and geology have been validated in preparation for drilling. Aruma has scheduled 5,000m of first pass Reverse Circulation drilling over the high (>200ppb Au) tenor, 2km by 3.5km, drill defined gold anomaly at Slate Dam. This will be done by drilling 200m spaced lines of 100m deep angled drill holes at 50m intervals into the steeply dipping stratigraphy.

“Aruma now has significantly increased its landholding to over 260 sq. km in a desirable address east of Kalgoorlie which is highly prospective for gold. Our activity in the area is progressing well as we prepare to drill covering the large high tenor gold anomaly at Slate Dam,” Managing Director, Peter Schwann said.

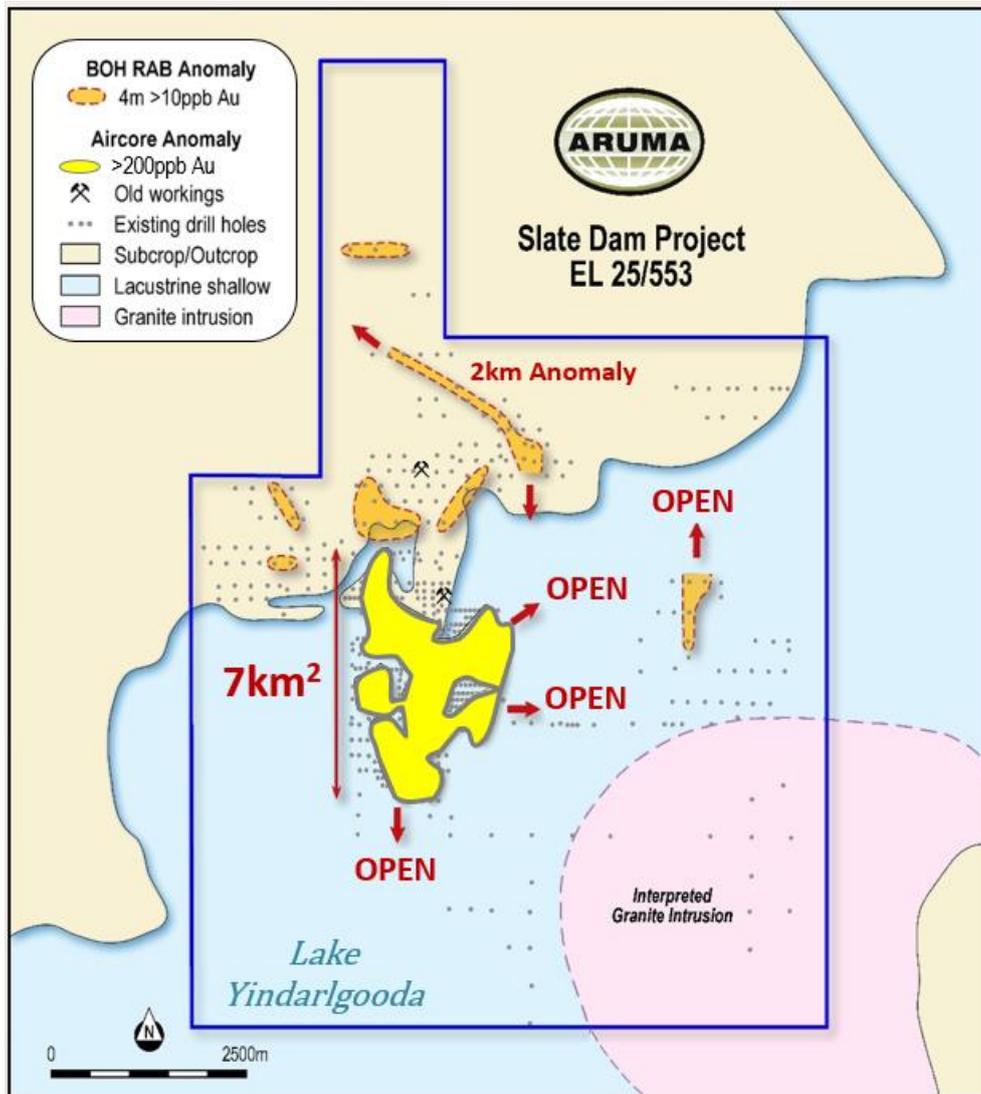

Figure 2 Slate Dam drilling generated gold anomaly from previous figure showing gold anomalies >250ppm Au. Note the anomaly is controlled by the drilling and remains open in all directions.
